

Premium Horse Minerals

Suitable For Most Horses

PN Premium Horse Minerals is a new improved mineral formula that delivers a broad spectrum of 74+ minerals, 14 amino acids, 10 vitamins, biotin and probiotics.

PN Premium Horse Minerals may deliver your horse with:-

- **Over 90 Minerals, Vitamins and Amino acids**
- **Probiotic Formula**
- **Enhanced Feed Conversion**
- **Detoxification**
- **A Healthier Looking Coat**
- **Stronger Hooves and Hoof Repair**
- **Joint Support**
- **Improved Behaviour**
- **Improved Stamina**
- **Build a Healthier Immune System**
- **Assist with Oxalate Grasses**

The Minerals in this product has been extracted and derived from Sea Plants, Kelp, Age Old Healing Plants and Herbs, Colloidal Minerals, Clay Dolomite, Clay Calcium Bentonite, Diatomite, MSM Plant Sulphur, Moringa Powder and more.

Always look for plant derived minerals, as they have already been through a process called photosynthesis, making them much easier and safer for a horse's digestive system to absorb. This enhances any horse's wellbeing, as they deliver instant nutrition, unlike rock and metallic derived minerals, which may contain heavy metals. Minerals are the key catalyst for vitamin and amino acid assimilation. Your horse needs minerals for growth, energy, stamina, healthy bones and joints, muscle health, hoof, coat and a healthy immune system.

PREMIUM blend Horse Minerals 2kg	PN207
PREMIUM blend Horse Minerals 5kg	PN208
PREMIUM blend Horse Minerals 15kg	PN209

Premium Horse Minerals

In today's equine world, many horses are kept in stables, yards and small pasture paddocks and fed a variety of hay, grain or processed feeds. In many cases, horses are only fed what the horse owner can afford. Many of our soils where our pastures and grains are grown are weathered, over grazed, over worked and are depleted of nutrition through a lack of minerals and soil microbes in the soil, hence the need to supplement with a broad spectrum of nutrients. Supplementing with plant derived nutrients means that the minerals are readily absorbed into the horses digestive tract, where as hard metallic minerals may become as toxic heavy metals affecting the horses general wellbeing. Besides affecting the horses wellbeing you may only be getting between 3 and 11% of the minerals available from those minerals and they may be affecting the assimilation of other nutrients.

Minerals Short List Analysis

Nitrogen	0.03%	Sodium	3.4%
Phosphorus	150ppm	Boron	8 ppm
Potassium	0.3%	Iron	650ppm
Sulphur	0.9%	Aluminium	70 ppm
Calcium	4.2%	Carbon	6%
Magnesium	1.8%	Silica	15%
Manganese	120ppm	Iodine	12ppm
Copper	50ppm	Selenium	8ppm
Zinc	150ppm	Geranium	2ppm
Chromium	6ppm	Fluoride	1.3ppm

Vitamins

Vitamin A	300 U/Kg
Vitamin B1	40 mg/kg
Vitamin B2	0.5 mg/kg
Vitamin B3	4.6 mg/kg
Vitamin B6	46 mg/kg
Vitamin C	2 mg/kg
Vitamin E	1.28 mg/kg
Choline	66 mg/kg
Pantothenate	1.4 mg/kg
Carotene	8.4 mg/kg
Biotin	4ppm

Amino Acids

Aspartic acid	0.14 %
Threonine	0.04%
Serine	0.04%
Glutamic Acid	0.10%
Proline	0.03%
Alanine	0.05%
Valine	0.04%
Cysteine	0.02%
Methionine	0.01%
Isoleucine	0.03%
Leucine	0.05%
Lysine	0.04%
Arginine	0.03%

The minerals in this product have been micronized for better absorption through the horses digestive system

PN Premium Horse Minerals have been enhanced with an organic probiotic to assist with feed conversion from an increased microbial action in the horses hind gut.

PN Premium Horse Minerals has also been enhanced with Biotin. Biotin is a member of the B complex group of vitamins and is most known for supporting nutrients for healthy skin, coat and hooves. Biotin is a vitamin that must be obtained either through the diet or via the absorption of Biotin that is synthesized by intestinal bacteria. Biotin is similar to other B-vitamins in that it is essential in the conversion of feedstuffs for energy so horses can grow, work and reproduce. Biotin is found in virtually every cell in the body and is an essential coenzyme in carbohydrate, fat and protein metabolism. This B-vitamin is also important for normal thyroid and adrenal gland function, reproductive tract health, nervous system stability, the growth and repair of skin and hooves.

Probiotics in the PN Premium Horse Minerals are made from fermented fruits and plants that assists in building good gut bacteria in the hind gut. Good gut bacteria's assist in the conversion of feeds and nutrient assimilation.

Moringa has over 90 nutrients and contains over 20% protein assisting in the overall delivery of nutrition. The moringa tree sends its roots many metres deep into highly mineralised soils making it one of the worlds highest nutrient rich herbs.
